OUR HERITAGE & LEGACY

ZEROTECH's origin comes from a USA family bloodline, James Watkins enlisted in the US army at the age of 18 years, prompted by the bombing of Pearl Harbor. James served in New Guinea, and the southern Philippines as a part of the Philippine Liberation campaign. After the War ended, James was discharged on 30th December 1945.

James moved to Australia and founded Tasco Sales (AUST) Pty Ltd (TSA) in 1965. Now recognised as the largest specialty optical distributor in the southern hemisphere, for over 50 years, TSA has proudly presented leading optical brands to the commercial and consumer market, however, the range of accessible, high-quality rifle scopes was always a challenge to provide.

In 2018, TSA founded ZeroTech Optics to fill this gap. Focusing solely on providing high-quality, accessible, and precise rifle scopes that meet the stringent Australian quality assurance requirements, ZeroTech rifle scopes were quickly adopted into the Australian shooting market. The year 2020 saw ZeroTech go international, establishing a base in the US and distributing to our partners in the Americas, Europe, the United Kingdom, Africa and South Pacific nations.

Designed, engineered and quality assured by our team in Australia, ZeroTech scopes deliver repeatable performance using precision turret systems and ZeroTech proprietary reticles that apply to a range of applications and environments.

ZeroTech VENGEANCE 6-24x50 FFP Rifle scope, designed to meet the needs of both novice and seasoned shooters alike. This rifle scope offers advanced features, including the first focal plane RMG reticle for consistent targeting at varying distances and elevation zero stop for dependable adjustments and reliable return to zero. Perfect for those who want long-range capability without the hefty price tag.

THRIVE

The THRIVE series is designed for hunters and shooters who demand quality and reliability without breaking the bank. Built with a 30mm tube and crafted from high-quality materials, THRIVE riflescopes offer excellent clarity and durability, making them perfect for a wide range of shooting activities. Whether you're hunting in the backcountry or fine-tuning your accuracy at the range, THRIVE riflescopes deliver consistent performance and value.

With their straightforward design and ease of use, these scopes are ideal for beginners and seasoned shooters alike who need dependable optics for general-purpose shooting.

At ZEROTECH, we recognise modern advancements in firearms and ammunition technology have unlocked previously unattainable levels of precision. Our focus is to develop exceptional aiming systems. ZEROTECH reticles have been carefully designed to enable shooters to extract the highest potential from their shooting systems. Carefully tailoring a blend of precision and usability, ZEROTECH reticles are perfect for all shooting applications.

FIRST FOCAL PLANE

RMG FFP

Whether holding elevation and windage for high speed, precision shots or dialling your turrets for long range targets, the RMG (Refined Mil Grid) is the perfect blend of precision and speed. Subtended in 0.5 mil increments with integrated 0.1 mil measuring bars, the RMG allows shooters to apply elevation and windage holds without having to dial the turrets. A floating centre dot ensures a refined point of aim for zeroing and shooting groups, while the heavy bars with chevron ends at 3, 6, 9 and 12 o'clock help draw the shooter's eye to the centre of the reticle at lower magnifications.

RMG MOA FFP

Subtended in 2 MOA increments with integrated 1/2 MOA measuring bars, the RMG MOA allows shooters to apply elevation and windage holds without having to dial the turrets. A floating centre dot ensures a refined point of aim for zeroing and shooting groups, while the heavy bars with chevron ends at 3, 6, 9 and 12 o'clock help draw the shooter's eye to the centre of the reticle at lower magnifications.

RMG ILLUMINATED FFP

Whether holding elevation and windage for high speed, precision shots or dialling your turrets for long range targets, the RMG (Refined Mil Grid) is the perfect blend of precision and speed. Subtended in 0.5 mil increments with integrated 0.1 mil measuring bars, the RMG allows shooters to apply elevation and windage holds without having to dial the turrets. A floating centre dot ensures a refined point of aim for zeroing and shooting groups, while the heavy bars with chevron ends at 3, 6, 9 and 12 o'clock help draw the shooter's eye to the centre of the reticle at lower magnifications.

RMG 2 ILLUMINATED FFP

Subtended in 0.5 mil increments with integrated 0.1 mil measuring bars, the RMG 2 allows shooters to apply elevation and windage holds without having to dial the turrets. A floating centre dot ensures a refined point of aim for zeroing and shooting groups, while the heavy bars with chevron ends at 3, 6, 9 and 12 o'clock help draw the shooter's eye to the centre of the reticle at lower magnifications. The illumination feature has been carefully designed to allow maximum usability of the reticle in all environmental conditions, whilst permitting effective shot placement at shorter ranges on lower magnification settings.

TREMOR 3™ FFP

The TREMOR3™ reticle is designed to maximise the speed and accuracy of marksmen. Its unique use of patented features gives users the capability to quickly estimate the range to targets while also giving the user wind speed and drop correction information for fast and accurate Second Shot Corrections.

Visit the Horus website for more information:

LR HUNTER FFP

Precision - Simplicity - Speed. The LR Hunter has been developed for shooters and hunters who are looking for a 'do it all' reticle. The combination of First Focal Plane (FFP) and adjustable illumination enables the LR Hunter to mimic traditional reticles on low magnification. Whilst at higher powers, a level of precision is on offer to help you connect with the farthest targets.

The LR Hunter is a true hybrid.

FIRST FOCAL PLANE

OSR

The Optimised Spotting Reticle (OSR) is a First Focal Plane (FFP), milradian based offset reticle. The OSR enables the largest possible field of view due to its offset design whilst retaining all the benefits of a FFP reticle.

When precision and speed matter, the OSR is the perfect companion.

SECOND FOCAL PLANE

R3 SFP

The R3 reticle allows the shooter to enjoy all aspects of a second focal plane (SFP) scope without losing the ability to 'hold over' with extreme precision for long range shots. The R3 features a floating centre dot and subtensions of 1 MOA marked by dots with a hash mark every 4 MOA. Heavy bars at 3, 6, 9 and 12 o'clock make target acquisition a breeze.

RAR SFP

The RAR Illuminated reticle allows for rapid target acquisition and speed shooting, yet enables precision shots when required. The heavy outer bars taper to sharp and precise points, leading the shooter's eye naturally to the centre of the reticle.

PHR-II SFP

The PHR II shares all the features of the PHR reticle with the addition of a floating centre dot for an ultra-refined point of aim as well as a finer 6 o'clock post, enabling even more precise elevation 'hold overs'.

PHR 3 SFP

Bringing the old world crosshair reticle into the new school of precision hunting, the PHR 3 is the solution! Designed with precision shooting in mind, the PHR 3 delivers many of the benefits of the PHR II reticle, in a simplified format.

PHR SFP

Indexed in MOA, the PHR mimics a more traditional hunting reticle with the addition of some modern advancements. A floating centre cross allows for a refined point of aim while losing none of the 'pointability' of a traditional hunting reticle.

MILDOT SFP

A traditional reticle, calibrated in mils, giving shooters the added ability to take long range shots with a high degree of precision.

ZEROPLEX SFP

A favourite reticle for shooters of all disciplines where speed and simplicity is key.

RIFLESCOPE MULTI-TOOL

Riflescope Multi-Tool for flip-up covers and turrets.

ZTA-MULTI RRP \$12

MAGNIFICATION THROW LEVER

Fits TRACE series riflescopes allowing rapid and tactile magnification adjustment.

MAGNIFICATION THROW LEVER RRP \$24.95

SUNSHADES

Sunshades thread directly into the objective of your ZT riflescope.

RRP \$39.95

THRIVE HD & TRACE 50MM MODELS	ZTA-SUNSHADE50
VENGEANCE 5-25X56	ZTA-SSVEN5256
VENGEANCE 4-20X50	ZTA-SSVEN4205

NEOPRENE SCOPE COVERS

ZeroTech Neoprene Scope Covers - Available in two sizes; small & large

SMALL	ZTA-COVERSML	RRP \$24.95
LARGE	ZTA-COVERLG	RRP \$24.95

ZEROTECH LENS CLOTH

Lens cloth designed for all ZeroTech optics.

ZTA-CLOTH RRP \$3.99

RISER FOR MICRO REFLEX

Compatible with TDHM21, TDHM21G & THDMM21

THDMM21-ZTRMSB01	LOW	RRP \$16
THDMM21-ZTRMSB02	HIGH	RRP \$26

ZEROTECH OPTICS PATCHES

70mm diameter, hook & loop fastening.

SHOOTER READY!	ZTCPATCH1	RRP \$9.95
THE LEGACY	ZTCPATCH2	RRP \$9.95
TACTICOOOL EAGLE	ZTCPATCH3	RRP \$9.95
AUSSIE HUNTER	ZTCPATCH4	RRP \$9.95

STUBBY COOLERS

ZeroTech Stubby Coolers are the perfect companions for keeping your beverages chilled during any event or outing.

Whether you're at a barbecue or on a camping trip, our stubby coolers guarantee your drink remains cool for longer.

Choose from our four unique designs: HNTR, RPRS, TAC, and BINO, each offering a distinct style to match your personal flair. 70mm diameter.

BINO PRS TAC HNTR

BINO	ZTCOOLERBINO	RRP \$4.99
PRS	ZTCOOLERPRS	RRP \$4.99
TAC	ZTCOOLERTAC	RRP \$4.99
HNTR	ZTCOOLERHNTR	RRP \$4.99

ZT OUTDOOR STICKER PACK

Outdoor vinyl transfers

- ▶ Includes: 1 x ZT & 1 x ZEROTECH
- ▶ 5 year UV rated
- ▶ Car window safe
- ▶ 30cm wide.

ZTA-ODSP	RRP \$6.95
